Good.

INJURIES:

A crew member suffered an injury August 19 when a log he was carrying had an attached limb and the limb entered his ear. He went in to the doctor yesterday because the pain persisted. They had originally thought it was a perforated eardrum but after the doctor scoped it, it was found to be a scratch on the eardrum. He was given a prescription for ear drops and told it was ok for him to return to duty.
